Cyber Security

Course Overview

The Professional Certificate in Cyber Security is an industry-oriented program designed to build strong defensive infrastructure skills along with offensive security foundations.

This course focuses on real-world networking, system administration, and ethical hacking concepts used by security professionals.

NETLIGENT TECHNOLOGIES LLP
TRAINING & PLACEMENT INSTITUTE

What You Will Learn

- Networking | Linux | CCNA
- Windows Server | Kali Linux
- Security Level - 1 | Security Level - 2
- Cloud Security Operations
- DevOps & DevSecOps Integration
- SOC (Security Operations Center)
- Digital Cyberforensics
- Mobile & Wireless Security

Address
Branch 1 - 152, Saif Complex, 3rd Floor, Zone-1, MP Nagar Bhopal

Branch 2 - Building-4, 2nd Floor, Krishak Nagar, Near Karond Square, Karond, Bhopal

CYBER SECURITY

PROFESSIONAL CERTIFICATE IN CYBER SECURITY

DURATION 8 MONTHS

Tools & Technologies

MODULE - 1 - NETWORKING

- OSI Model | TCP/IP Suite
- IP Addressing (IPv4/IPv6)
- Network Topologies
- Switching | Routing Basics

MODULE - 2- CISCO CERTIFIED NETWORK ASSOCIATE (CCNA)

- Configuring Routers and Switches
- Implementing VLANs, STP, and OSPF
- Network Access Control and IP Services.

MODULE - 3 - LINUX

- Linux File System | Permissions
- Shell Scripting | Server Management
- Hardening (SSH, FTP, Web Servers)

MODULE - 4 - WINDOWS SERVER

- Basic Commands
- Server Management
- Active Directory Domain Services (AD DS) Management
- Using Registry for system lockdown

MASTERS DIPLOMA IN CYBER DEFENSE & DEVSECOPS

DURATION 12 MONTHS

MODULE - 5 - OFFENSIVE SECURITY WITH KALI LINUX

LEVEL - 1

- Introduction
- Privilege Methodologies and Authentication Testing
- Virus Methodologies
- Information Gathering & Reconnaissance
- Vulnerability Research and Exploit Database Usage

LEVEL - 2

- Scanning Techniques
- Assessment and Penetration Testing
- Python Usage in the Testing Methodologies
- Metasploit Framework and Web Application Testing (XSS, SQL testing)

Final Project

WHAT YOU WILL LEARN MORE

- AWS Cloud
- Python
- Git & GitHub
- Gen AI

EVERY MODULE CONCLUDES WITH A "CAPSTONE LAB" SIMULATING A REAL-WORLD CYBER ATTACK

MODULE - 6 - CLOUD SECURITY OPERATIONS

- Securing Cloud Architecture (AWS/Azure/GCP)
- Identity & Access Management (IAM) and Virtual Private Clouds (VPC)

MODULE - 7 - DEVOPS & DEVSECOPS INTEGRATION

- Basics of CI/CD pipelines
- Containers (Docker)
- Automating security scans in the development lifecycle

MODULE - 8 - SECURITY OPERATIONS CENTER

- Threat Hunting and Log Analysis using SIEM tools
- Incident Response Orchestration and Playbooks

MODULE - 9 - DIGITAL CYBERFORENSICS

- Evidence Acquisition and Chain of Custody
- Memory Forensics, Disk Imaging, and Malware Analysis Basics

MODULE - 10 - MOBILE & WIRELESS SECURITY

- Attacking and defending WEP/WPA2/WPA3 protocols
- Application Security and Mobile Device Management

Final Project

Why Choose Us?

- Expert Trainers
- Live Projects
- Affordable Fees
- Industry-Focused Curriculum
- Career Guidance & Support

About Us?

Netligent Technologies LLP is a leading IT Training & Placement Institute committed to empowering students with job-ready skills through industry-driven learning programs.

Career Opportunities

After completing this course, you can apply for roles like:

- Network Administrator
- Security Technician
- Linux/Windows Administrator
- Junior Ethical Hacker
- Technical Support Specialist
- Cloud Security Architect
- SOC Analyst / Incident Responder
- DevSecOps Engineer
- Digital Forensics Investigator
- Mobile Security Consultant

Course Highlights

- ✓ Practical Hands-on Training
- ✓ Industry-Relevant Curriculum
- ✓ Real-Time Labs & Scenarios
- ✓ Infrastructure Security Focus
- ✓ Offensive Security Foundations
- ✓ Placement Assistance

Projects You will Build

- Secure Enterprise Network Design
- Cisco Network Configuration Project
- Linux Server Hardening Project
- Basic Penetration Testing Project
- Vulnerability Assessment using Kali Linux

Course Duration

- **Duration:** 7-8 Months / 11-12 Months
- **Mode:** Online / Offline
- **Daily Class:** 1.5 – 2 Hours
